

JFrame

```
graph BT; login[login] --> JFrame[JFrame];
```

A UML class diagram illustrating inheritance. At the bottom is a class box labeled 'login' with a gray fill and a thick black border. A solid blue arrow points vertically upwards from the 'login' box to a class box labeled 'JFrame' at the top. The 'JFrame' box has a white fill and a thin gray border. This indicates that 'login' inherits from 'JFrame'.

login
